WAR ORDER HUNT OF FEDERAL IMPORTANCE, SAYS MARSHALL

THE following statement concerning the wire tapping activities of the police was issued yesterday by United States Attorney Marshall:

I have made inquiry into the circumstances concerning the investigation now going on into the "listening on" the wire of Messrs. Seymour & Seymour, and find that the case which the Police Department referred to as having to do with the Federal authorities is a case which I know has been of interest for some time to the Federal authorities, as it involves national issues. Any publication of the facts in this case at the present time would be most regretfrom the standpoint of the administration of Federal justice.

The work of the Police Department during the recent strenuous times has been of the utmost benefit to the Federal authorities. I could cite one case after another to which they have devoted the greatest energy and the most clear headed intelligence. The Federal and city authorities work in entire harmony, and while I do not feel myself free to deal with names and cases, I can state most positively that the Federal Government is indebted in a great number of important cases to the Police Department for most valuable and efficient assistance

Mr. Marshall added that the law firm of Seymour & Seymour was not involved in the case, but that persons having desk room in their office were concerned.
